

FOX NEWS POLL

Anderson Robbins Research (D) / Shaw & Company Research (R)
N= 914 registered voters (712 landline, 202 cell phone)

Interviews Conducted:
April 3-5, 2011

For Release 6PM ET Wednesday, April 13, 2011

Methodology

The Fox News Poll is conducted under the joint direction of Anderson Robbins Research (D) and Shaw & Company Research (R). The poll is based on live telephone interviews with a national sample of 914 registered voters, and was conducted April 3-5, 2011 in the evenings.

Landline and cell phone telephone numbers were randomly selected for inclusion in the survey using a probability proportionate to size method, which means that phone numbers for each state are proportional to the number of voters in each state.

Results based on the full sample have a margin of error of $\pm 3\%$. Results among subgroups have larger sampling errors, including: Democrats (n = 376) $\pm 5\%$; Republicans (n = 344) $\pm 5\%$; Independents (n = 173) $\pm 7\%$.
